Skills

HTML, CSS, JavaScript, jQuery, SASS, Bootstrap, Ruby, Sinatra, Rails, React

Web Development Projects

Spotify Analysis, Ruby on Rails/D3.js <https://spanalysis.herokuapp.com>

- Search Spotify users by ID and view their playlists' audio features metrics (danceability, energy, valence)
- Visualize playlist data using D3.js to create pie charts
- Utilize Server-side Spotify API calls to retrieve all data

Feelng, Ruby on Rails <https://feelng.herokuapp.com/>

- Discover content (event, poem, and music) based on given mood represented by an emoji
- Build database schema to save user's generated content
- Make Spotify client-side API calls to find and play a playlist matching the chosen mood

Rumblr, Sinatra <https://rumblr-momo.herokuapp.com/>

- Tumbr clone built on Sinatra
- Validate user signup and registration with ActiveRecord and sessions controller
- Develop database relations to give users the ability to tag posts and search by tags

Experience
