https://khanontheweb.github.io/

Skills

HTML, CSS, JavaScript, jQuery, SASS, Bootstrap, Ruby, Sinatra, Rails

Web Development Projects

Feelng, Ruby on Rails https://feelng.herokuapp.com/

· Discover content (event, poem, and music) based on given emoji/mood

· Dynamic content generation made by API calls to foursquare, unsplash, poetryDB and spotify APIs

· Realtime chat with users who chose the same mood

Rumblr, Sinatra https://rumblr-momo.herokuapp.com/

· A tumblr-clone built on sinatra

· Custom user registration and signup using ActiveRecord and a sessions controller

· Ability to add tags to posts and search posts by tags

Friendly Bakery, Sinatra

· A bakery website that gives the user an inviting feeling

· Uses ActionMailer to e-mail the user the catalogue of the bakery

· Robust layout and models allow for new goods to be added without a new view created

Pokedex, HTML/CSS, Javascript https://khanontheweb.github.io/pokedex/

· A single-page app to view Pokemon and their stats via name or number

· AJAX calls when a Pokemon is searched for to load assets without page refresh

· Search pokemon by name or number

Experience

Student Lead Technician

Client Support, Stony Brook   01/2017 – 07/2018

· Trained over 20 students in troubleshooting faculty/staff and student computer issues

· Lead IT support operations for the Administration faculty of over 100 people
